

FOUNDATION LM MAKES GOOD FERTILISER PROGRAMS EVEN BETTER

A good crop fertility program delivers the right nutrients in the right place at the right time.

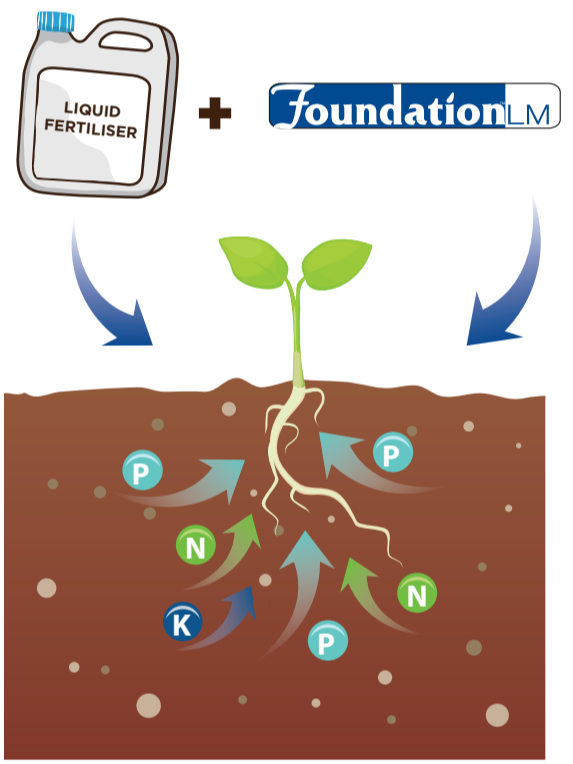

PROBLEM

Nutrients in fertilisers and in the soil aren't always in plant-available forms when crops need them.

SOLUTION

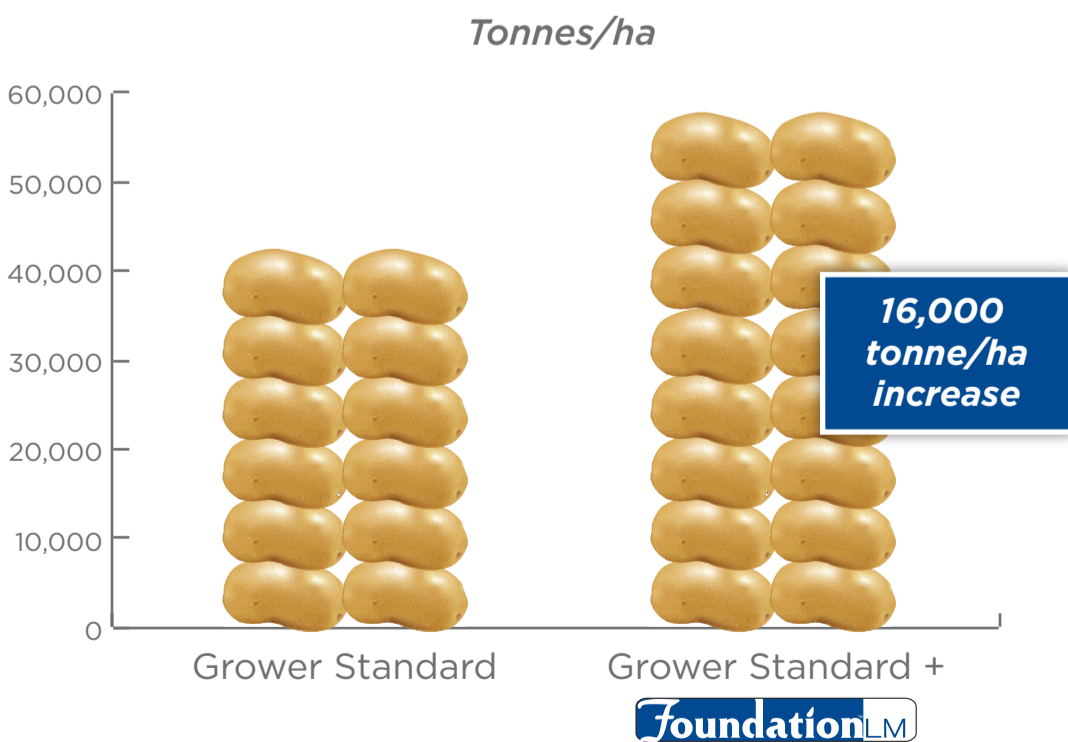

Biocatalyst technology help get nutrients into the right form.

Concentrated biochemistry in Foundation LM helps quickly convert nutrients into plant-available forms and facilitates nutrient uptake.

THE RESULTS?

Increased fertiliser efficiency, improved plant performance and higher yields.

Processing Potatoes - Manjimup, WA (2015)
Foundation LM applied at 10 L/ha in furrow at planting

Based on Nature. Built on Science.
