

Enhancing Granular Fertiliser Applications for **Higher Yields** and **Better Crop Quality**

PROBLEM:

Growers want the best return on their granular fertiliser investments, but applied nutrients aren't always available to the crop when it needs them.

SOLUTION:

Biocatalyst technology can help growers get the most from their P & K spend.

BASIS XC is a biocatalyst for granular fertilisers that maximises nutrient availability and uptake.

The Results:

- + Better, faster release and mineralisation of applied P
- + Better, faster release of K
- + Better plant uptake

BENEFITS:

Higher potential yields, better crop quality and more ROI on granular fertiliser programs.
